Why choose GoodAire® DrysanZ™

- **Harmless, Non-Toxic Repellent:** An eco-friendly alternative to conventional toxic repellents.
- **Indoor Air Quality:** Effectively neutralizes odors and sanitizes the air.
- **Pet Owners:** Tackles pet odors and sanitizes environments for optimal care..
- **Food Preservation:** Utilizes chlorine dioxide (ClO_2) gas to enhance food freshness and prevent spoilage.
- **Continuous use:** effectively protecting, neutralizing and repelling 24/7
- **Unbeatable Portability:** Versatile use across various environments. Take it wherever you go
- **Simplified Usage:** eliminating the need for direct application on skin, offering an easy-to-use sachet that can be placed in any environment

The Technology behind GoodAire® - DrysanZ™

GoodAire® DrysanZ™ utilizes a Proprietary Formulated Chlorine Dioxide (ClO_2) as its primary component, valued for its broad-spectrum antimicrobial properties. Our patent pending Controlled, Ultra-Slow release technology ensures a safe and controlled release rate of 0.1ppb, allowing for longer exposure and safer use.

At GoodAire®, we're dedicated to continuous air purification, sanitization, and odour elimination, providing a proactive solution to maintain and improve air quality across different settings
